STRONG QUIET TYPE®

THE EASY-I® JOISTS ARE ENGINEERED TO WEIGH LESS, SPAN FURTHER, AND PERFORM BETTER THAN TRADITIONAL SOLID SAWN LUMBER JOISTS. NASCOR'S EASY-I® OFFERS NUMEROUS ADVANTAGES OVER CONVENTIONAL FLOOR SYSTEMS BUILT WITH 2x10 AND 2x12 LUMBER.

CONVENTIONAL JOISTS SHRINK, TWIST, AND CROWN AS THE LUMBER LOSES MOISTURE. THE RESULT IS A SQUEAKY, UNEVEN FLOOR SURFACE. EASY-I® JOISTS ARE ENGINEERED COMPOSITE I-BEAMS MANUFACTURED FROM KILN DRIED LUMBER AND SPECIALLY DESIGNED ORIENTATED STRAND BOARD. THIS CONSTRUCTION ELIMINATES

PERFORMANCE-RELATED PROBLEMS LIKE SHRINKAGE, WARP, AND SQUEAKS; AND ENSURES A STRAIGHTER MORE LEVEL FLOOR. THE RESULT IS A STRONGER FLOOR THAT IS EASY-TO-INSTALL, VALUE PRICED, AND GUARANTEED FOR THE LIFE OF THE HOME.

THE EASY-I®

NASCOR'S EASY-I® COMBINES ALL THE BENEFITS OF AN I-JOIST WITH THE SIMPLICITY OF A 2x10. AVAILABLE IN TWO DEPTHS: 9½" AND 11½" THE EASY-I® CAN BE UTILIZED IN THE MAJORITY OF RESIDENTIAL APPLICATIONS AS A REPLACEMENT FOR 2x10 AND 2x12 DIMENSIONAL LUMBER.

THE EASY-I® HAS THE LOOK AND FEEL OF CONVENTIONAL LUMBER. UNLIKE JOISTS WITH LVL FLANGES, THE EASY-I® IS BASED ON SOLID SAWN 2x3 FLANGES. HAVING THE INCREASED LUMBER IN THE VERTICAL (2½") PROVIDES FOR EASY FASTENING AND INSTALLATION. A 2½"
